DIGITECH SYSTEMS

Are manual processes costing your organization time and money? Thanks to recent government regulations, most healthcare organizations now depend on Electronic Health Records (EHR) to access critical patient information, but many still rely on paper documents in areas like claims processing, finance, and Human Resources (HR). According to the American Medical Association (AMA), primary care physicians spend, on average, over five hours a day on data entry and other EHR-related tasks.[1] With *ECMNOW!* providers can close this significant technology gap and get back to the business of patient care while reducing operational costs.

EFFICIENCY NOW

- Improve the accuracy of your data and eliminate manual data entry by extracting information automatically by leveraging our patented Artificial Intelligence (AI) engine.
- Integrate your ECM, EHR, and other line-of-business (LOB) applications seamlessly with Enterprise Content Management (ECM) software to improve productivity.
- Automatically capture, sort, and index all health records with Intelligent Automation (IA) to streamline records processing.

CONTROL NOW

- Securely manage Protected Health Information (PHI) to ensure compliance with federal regulations mandated by the Health Insurance Portability and Accountability Act (HIPAA).
- Hide sensitive PHI from unauthorized users with multiple layers of security to ensure patient information is safe from prying eyes.
- Know when and how files are being accessed with audit reports to provide detailed evidence of system security.

MONEY NOW

- Change capital expenses into tax-deductible operating expenses and improve your bottom line by implementing a cloud solution, such as ImageSilo® to eliminate hardware and IT expenses.
- Save money on labor by leveraging PaperVision® Enterprise WorkFlow to automate the document routing and approval process.
- Avoid costly noncompliance fines by ensuring your patient records are securely and accurately managed and protected.

> *"Data is rapidly becoming the currency of healthcare, and organizations are recognizing the critical nature of investing in technology to curate and make data available across their enterprise in a consistent and well-managed fashion."*
>

IDC ANALYZE THE FUTURE

What Problems Can *ECMNOW!* Solve?

What if you could reduce the amount of time your medical staff wastes manually managing patient files? With *ECMNOW!* you can streamline document management processes, decrease wasted time, and improve the productivity of the entire organization.

Eliminate Manual Data Entry

Are you spending hours manually typing in patient information? Too often, doctors and staff spend more time manually entering data into their EHR systems than they do with their patients. With *ECMNOW!* you can leverage our patented AI engine to automatically extract data and eliminate manual processes so you can get back to the business of patient care.

Comply with HIPAA Regulations

Are you in compliance with federal regulations? Under HIPAA, PHI must be kept safe from unauthorized users. With *ECMNOW!* you can customize each users security settings to ensure private information remains safely protected and only accessible from approved users.

Secure Sensitive Data

Are you storing your patient files securely? Under federal regulations, PHI must be electronically protected to ensure the integrity of all patient information. *ECMNOW!* provides extensive security and encryption settings to ensure patient data remains secure while in transmission and at rest.

Save Money by Moving to the Cloud

How much money are you spending on managing your business and patient files? Free yourself from hardware, software, and other IT related expenses by moving to the cloud. With ImageSilo, you can turn capital expenses into tax-deductible operating expenses saving the entire organization money.

Recover From Disaster Quickly

Are your important documents safe if disaster struck? Paper files are vulnerable to theft, loss, natural disasters, and cyberattacks. With *ECMNOW!* you can electronically protect your documents and ensure they are safe if disaster should strike—no matter the cause.

Integrate Seamlessly

Do you work with external systems or various line-of-business applications? Manually managing patient files this way can be a time-consuming, inefficient process. *ECMNOW!* comes with easy to use point-and-click integrations that make it simple to join various systems together helping you improve patient care.
