How can robots improve your business processes?

DIGITECH SYSTEMS

Are you struggling from slow business processes?

90% of general accounting operations and over **70%** of financial reporting processes are automatable.
- Gartner

75% of organizations report having **trouble** getting the **right information** to the right process worker.

The global RPA market size was **$1.1 billion in 2019 and** is anticipated to grow at a **33.6% CAGR from 2020 - 2027.**
- Grand View Research

What is Robotic Process Automation (RPA)?

"Robotic Process Automation (RPA) automates repetitive, rules-based tasks, that are normally performed by a human through electronic user accounts called 'bots'."

How will RPA help your business?

Eliminates human error by automatically extracting key information, so that business data is always correct.

Streamlines business processes by automatically routing data through workflows, increasing employee productivity.

Improves accuracy of data, speed of processes, and enables better decision making, all of which save organizations money.

> **Over 80% of organizations that have implemented RPA indicated a happier workforce and improved productivity.** - Deloitte
