Digitech Systems ECM Solutions with Epson WorkForce Pro GT-S50 and GT-S80 Scanners Makes Document Scanning Incredibly Easy and Flexible

LONG BEACH, Calif., March 29, 2011 – Digitech Systems makes the process of capturing and managing business documents for customers simple, flexible, and affordable using Epson WorkForce Pro document scanners. The company recently integrated Epson WorkForce Pro GT-S50 and GT-S80 scanners with their enterprise content management (ECM) solutions, PaperVision® Enterprise (on-premise ECM) and ImageSilo® (content management in the cloud). The combined solution enables users to quickly and easily capture data from documents, as well as index and process data in ways that increase productivity and overall efficiency.

Digitech Systems worked extensively with Epson to certify the WorkForce Pro scanners with its ECM software and services, and found the scanners to be an important resource for productivity. The WorkForce Pro GT-S50 and GT-S80's simple one-touch operation, faster scan speeds and higher image quality accelerate the process of data input and contribute to more reliable OCR performance. In addition, the scanners' affordable prices and sleek desktop design made them an attractive addition to any office.

"The Epson WorkForce Pro GT scanners' easy-to-use feature sets including one-touch operation and the ability to configure on-screen buttons and menu options to link directly to PaperVision Enterprise and ImageSilo have proven outstanding in their performance and reliability," said Sean Morris, Director of Sales at Digitech Systems. "With just one touch of a button, users can quickly and easily scan a document, pre-populate forms, and automatically index information by departments, projects, or any other criteria they wish. The fact that it's also so easy for end users to operate virtually eliminates any need for training."

Epson WorkForce Pro scanners are optimized for small- to medium-size businesses, or a single department within a larger organization. They deliver versatile features that are easy to use, fast sheet-fed scanning (up to 80 ipm* with the GT-S80), robust paper handling, high-quality 600 dpi optical resolution, and high daily duty cycles. They can also scan everything from business cards to rigid ID cards and documents up to 8.5 x 36 inches, all with simple one-touch operation.

Epson's exclusive ReadyScan LED technology virtually eliminates having to wait for the scanner to warm up. Both scanners also feature a unique LCD on the front panel that shows users exactly which scan job/configuration has been selected.

"Epson WorkForce Pro GT-S50 and GT-S80 scanners are engineered to deliver the best balance of features, performance, reliability, and price for leading business ECM providers such as Digitech Systems," said Bill Gates, channel development manager, Epson America. "Epson is very pleased to see how well these scanners have been serving the needs of Digitech Systems' customers and we look forward to supporting that success even further in the future."

About Digitech Systems, Inc.

Digitech Systems, Inc. enables businesses of any size to more effectively and securely manage, retrieve and store corporate information of any kind using either PaperVision Enterprise content management (ECM) software or the world's most trusted SaaS ECM service, ImageSilo. By significantly reducing the cost, Digitech Systems has moved ECM from a luxury convenience to an essential element for every well-managed business. Digitech Systems continues to raise the standard of excellence in the ECM sector, as evidenced by the numerous awards they have received including the InfoWorld 100, CRN's Emerging Tech Dynamos and multiple Nucleus Research ROI Awards.
