

# What if You Could "Magically" Classify and Extract Data?

*Intelligently automate data entry*

Processing paper-based forms costs companies a bundle due to manual document sorting and hand-keying of data.

22% of an employee's time is spent on repetitive tasks like data entry.  
- Cognizant, 2019

55% of businesses scan forms and manually re-key data as part of their workflow.

- AIIM, 2019

2/3's of organizations can't easily identify basic metadata for over 50% of their documents.

- AIIM, 2019

## PaperVision® Forms Magic™ Technology
