

# Is Your Healthcare Organization Prepared for the Future?

"Data is rapidly becoming the currency of healthcare, and organizations are recognizing the critical nature of investing in technology to curate and make data available across their enterprise in a consistent and well-managed fashion." - Cynthia Burghard, Research Director, IDC

The PaperVision® product suite helps healthcare organizations easily automate processes, save money on document storage costs, and securely manage patient Protected Health Information (PHI) in compliance with industry regulations like the Health Insurance Portability and Accountability Act (HIPAA).

On average, the PaperVision product suite has helped healthcare organizations:

Save	Experience	Reduce	Enable
			
<b>\$178,000</b> annually	an <b>ROI of 817%</b>	processing times by <b>118%</b> and <b>2,335</b> hours annually.	<b>100% compliance</b> with industry regulations like HIPAA

"With ImageSilo®, patients only do paperwork once—on their first visit. After that, we can instantly pull up their records instantly, which allows us to provide better care much more quickly."

- Jocelyn Scott,  
Director of Medical Records,  
Netcare Access

"Patient records are readily accessible with PaperVision® Enterprise, which helps clinicians make life-saving decisions. We're saving \$437,500 every year in staffing, offsite scanning, and office supply costs, and efficiency throughout the Hospital has greatly improved."

- Kathy Lavelle,  
CFO, Woodstock Hospital

"With the help of PaperVision® Capture and PaperVision Enterprise, we're able to ensure protection of more than 10,000 records. The cost savings is remarkable -Digitech Systems' products have helped us save more than \$259,000!"

- Mary Peelan,  
Director of Health  
Information Services

Manage patient data from Any Document.

Access patient information from Anywhere.

Make informed patient care decisions Anytime.®

## Are You Prepared for the Future of Healthcare?
