

Are You Managing Patient Data Intelligently?

Securely manage patient information from anywhere, anytime.

Many healthcare providers are using an Electronic Health Record (EHR) for current patient information, but the EHR doesn't give them access to older, paper-based patient records reducing efficiencies and the quality of patient care.

59% of consumers have significant concerns regarding the security of making healthcare related payments. - MedData

5.9 hours - Amount of time primary care physicians spends each workday on data entry and other EHR-related tasks.

- AMA

52% of patients prefer to receive medical bills electronically.

Make informed patient care decisions **Anytime.**

" ImageSilo® has been a reliable, stable platform for us since the very beginning. We don't have issues and we don't lose stuff like we used to. It keeps our productivity up, it keeps our organization structured, and reduces our time. We wouldn't change a thing! "

- Gina Eastin
Director of Revenue Cycle Services
Yuma Hospital

" Patient records are readily accessible with PaperVision® Enterprise, which helps clinicians make life-saving decisions. We're saving \$437,500 every year in staffing, offsite scanning, and office supply costs, and efficiency throughout the Hospital has greatly improved. "

- Kathy Lavelle, CFO,
Woodstock Hospital

" With the help of PaperVision Capture and PaperVision® Enterprise, we're able to ensure protection of more than 10,000 records. The cost savings is remarkable - Digitech Systems' products have helped us save more than \$259,000. "

- Mary Peelen
Director of Health Information Services
Mental Health Center of Denver
