

## Are you overdue for an information management checkup?

Struggling to gain control of your digitization efforts? Want to maximize the value? In the healthcare industry, the need has never been greater for Enterprise Content Management (ECM) tools to organize, protect and utilize information electronically. Also, ECM tools make it easy to digitize the tons of paper still out there: patient record archives, billing and human resource records. We know patient care is your ultimate goal. We're partners in that effort. Learn how the PaperVision® suite of products can help you provide better patient care and run a more cost-efficient business.

### Any Document.

- Manage patient and office records with a flexible secure system that works with existing software.
- Digitize your paper documents to speed access to information for better patient care.
- Capture, sort and index outside emails and other information to streamline office operations.

### Anywhere.

- Ensure staff and patient safety by enabling remote access to records using virtually any device.
- Keep work moving by assigning, routing and reviewing documents and performing other tasks online.
- Provide secure record access and storage with strong security settings and detailed audit trails.

### Anytime.®

- Deliver better, faster patient care by accessing complete medical histories 24/7/365.
- Retrieve records quickly for patients, other providers to improve patient care and customer service.
- Improve office efficiency by scheduling billing and other automated tasks at convenient times.

*"I don't know how we functioned before our (electronic health records) and PaperVision® Enterprise. It is the source of our productivity and makes a world of difference. I have been doing this for 35 years and I can tell you that it has revolutionized our business."*

- Sherry Engleman  
AllHealth Network

## Are you missing out on the benefits of ECM for healthcare?

You're gaining on digitization but it's hard to keep up, right? You're on data overload. Regulations only add to your stress. To thrive, healthcare providers should focus on "investing in exponential technologies to reduce costs, increase access and improve care," business consultant Deloitte says. The PaperVision suite of products lets you electronically manage everything from patient files to office tasks like supplier invoicing.

### Improve patient care

Get the right information in the right hands at the right time to better guide patient care. PaperVision provides the ECM platform and tools to easily collect, organize, access and manage a patient's complete health history. Provide patients fast access to all of their health records and billing statements.

### Easily enable remote/hybrid work

The trend toward remote and hybrid (part-time remote) work will continue, consultants say. Offer employees a way to safely access and manage health records and office data on any device from anywhere. You'll have happier employees and more job candidates.

### Enjoy savings and efficiencies

Digitization falling short? Still buried under costly and staff intensive office paperwork? Automate tasks such as billing. Digitize job applications and patient inquiries at the outset. Avoid regulatory fines by providing patients secure, quickly accessible records.

### Comply with regulations

Want to avoid big fines for data breaches? Want to capture a bigger share of government funding set aside for healthcare providers? Keep your office in compliance with regulations governing patient privacy, fast record access and other health IT.

### Take advantage of government funding

Don't miss out on government funding opportunities. The COVID-19 economic recovery packages approved by Congress set aside hundreds of millions of dollars for healthcare information technology, including more than \$500 million for rural providers.

### Help the environment

Digitization aids sustainability. Beyond reducing the use of paper, cloud-based services such as PaperVision®.com and ImageSilo® cut CO<sup>2</sup> emissions and streamline operations. You'll save money and help the environment.

*"It is really important to us to be able to provide top-notch patient care. Now, when anyone needs to access a patient's file they can do so immediately. Improving access to patient records helps us ensure we're providing the best patient care."*

-Kathy Lavell, Woodstock Hospital
